

INGOTTM
SAFETY EYEWEAR

**Sleek, Metal-Frame Style...
Without the Metal-Frame Price.**

Discover a treasure trove of value. **Ingot**TM safety eyewear provides the high-end, modern look of metal-framed safety glasses, but without the heavy weight or high price. The faux-metal frame offers an antique gold or gunmetal silver finish for a product that is rich with style and worlds away from the dull safety glasses of the past.

Though it has the upscale appearance of metal, the **Ingot** frame is polycarbonate, making it extremely lightweight and comfortable for all-day wear. Soft rubber temples and a fingertip nosepiece give it even more comfort features and keep the glasses in place on a wearer's face. No hot metal touching the skin or poking the head...just cool, wearable eye protection that weighs less than an ounce.

Loaded with style and comfort, **Ingot** offers fierce protection too. The safety glasses are independently tested and certified by Underwriters Laboratories to meet ANSI Z87.1+ and CSA Z94.3 standards. **Ingot** also meets the ballistic impact resistance requirements for eyewear in U.S. Military Performance Specification MIL PRF-31013.

The look of fine metal, paired with comfort and durability...all at an affordable price. If you're hunting for hidden treasure, discover the value of **Ingot**.
