

THESE SAFETY GLASSES ARE KILLING ME

Disaster can strike at any time, and your employees' eyes are left defenseless when they remove their safety glasses to relieve pressure points. It's at that very moment that an accident can happen.

Gateway Safety's Temple Technology® safety eyewear is a collection of products with patented designs to provide lasting comfort. Each product in this family features unique temples that flex or cushion the sides of the head and face. Employees stay headache-free, productive and, most importantly, protected.

Try out true temple comfort.

Two-piece patented temples include flexible component to relieve pressure.

Patented temples softly hug the head, alleviating pinching.

Super-flexible temples easily conform to any head size.
