

# Conqueror® Holds True

## High Impact Safety Glasses Prevent 'Potentially Deadly' Workplace Injury

It was just another day in Mulberry, Florida for Jay Engle of Safety Solutions & Supply when his longtime customer, Dirk, walked into his store. Dirk was excited about something, and Jay could tell he had a story to share.

***"I just need to thank you for my eyesight!"*** Dirk exclaimed.

Jay was surprised by the comment, taking it in for a moment.

Dirk went on to explain:

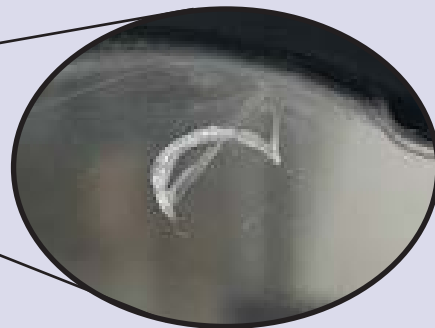

*"There was a mechanical failure on the jobsite today and an extremely heavy, and potentially deadly (or at minimum life-altering) sharp piece of metal struck my Gateway Safety glasses at a high rate of speed."*

*Heavy metal projectile that struck the Conqueror lens*

But Dirk takes quality seriously, and had on his Gateway Safety Conqueror® safety glasses, a comfortable, popular style that also has been independently tested and certified to pass the ANSI Z98.1+ high impact standard. Conqueror also meets the ballistic impact resistance requirements for eyewear in US Military Performance Specification MIL PRF-32432.

***The Conqueror lens held true without breaking or shattering, while safely deflecting the projectile.***

*Scratched lens, no penetration*

*"Dirk was so animated while sharing this story that I have to admit, it made me feel like I was there and even my adrenaline started flowing," said Jay. "It really puts things in perspective to know without a doubt, that your safety glasses work as advertised. The Conqueror safety glasses either just saved our customer's life...or saved him a lifetime of eyesight! I know I'm glad I carry safety glasses that have the Gateway Safety stamp of quality for these real workplace situations."*
