

FLIGHT™

SAFETY ★ EYEWEAR

Revolutionary in Design. Take Flight With Infinite Comfort.

Flight™ safety eyewear soars into a new territory of comfort, with an unconventional, patent-pending temple design that will change the face of traditional safety eyewear. Now, workers who dread headaches due to long-term eyewear use, can turn to **Flight**.

Featuring soft, cushioned temple 'wings' that softly hug the head, **Flight's** Temple Technology™ construction helps alleviate the pinching behind the ears that employees hate... which, in turn, helps to reduce employer issues with compliance. A soft, rubber nosepiece and a lightweight design contribute added features to ensure unparalleled comfort.

The unique floating lens design, which allows air flow between the frame and the lens, helps fight fogging. Plus, **Flight** safety eyewear provides exceptional impact protection. It meets and exceeds ANSI Z87+, CSA Z94.3 and the ballistics section of the U.S. Military Standard.

Flight — with Temple Technology features — pilots a new era of safety eyewear, with temples that provide superior comfort and fit for any size face. Put your whole crew in **Flight** and watch comfort ... as well as compliance ... take off.

Patent-pending temple design.
