

# SILVERTON™

SAFETY EYEWEAR

## The gold standard in dust protection ... is silver.

Digging in the dirt kicks up a lot of dust, but sometimes you pull out a silver treasure. **Silverton™** safety eyewear delivers authentic, foam-lined protection for the dustiest environments.

Instead of traditional foam with uniform height, **Silverton** features Gateway Safety's OptiFit™ foam. This unique, tapered-shape foam better fits the contours of the forehead and face, providing a better seal against dust and perspiration. Plus, venting channels are strategically placed along the foam to minimize fogging, so you can keep mining for the treasures of your trade all day long.

**Silverton** is available in two options — offering you a choice in your battle against dust and small particles that can irritate the eyes. Select the temple version for the versatility of a spectacle or the adjustable strap version for a more goggle-like fit. Each has a comfortable yet industrial design to fit in well wherever the next rush might take you.

When dust and debris threaten to cloud your vision, wear **Silverton** to strike it rich. Now that's a claim worth staking.

**Gateway**  
SAFETY

With a tough, industrial design, Silverton blocks dust and debris coming from any angle.

# SILVERTON™

SAFETY EYEWEAR

## SILVERTON Features

- Tough, industrial design; safety eyewear that looks as tough as it protects.
- Two options: choose the temple version for the versatility of a spectacle or choose the adjustable strap version for a more goggle-like fit.
- OptiFit™ foam lining features a tapered design for a better seal around the eyes.
- Venting channels along foam minimize fogging.

Thicker foam at outer edge keeps debris out of the eye.
