• Classic Style Hearing Protector.
• Three-Position, Adjustable Headband for Versatile Fit.
• Ultra-Lightweight Design Provides All-Day Comfort.

Improper fit of this device will reduce its effectiveness in attenuating noise. Consult the accompanying instructions for proper fit.

Although hearing protectors can be recommended for protection against the harmful effects of impulsive noise, the Noise Reduction Rating (NRR) is based on the attenuation of continuous noise and may not be an accurate indicator of the protection attainable against impulsive noise such as gunfire.

Example:
1. The environmental noise level as measured at the ear is 92 dBA.
2. The NRR is 25 decibels (dB).
3. The level of noise entering the ear is approximately equal to [92 dB(A) –25] 67 dB(A).

Example:
1. The environmental noise level as measured at the ear is 92 dBA.
2. The NRR is 25 decibels (dB).
3. The level of noise entering the ear is approximately equal to [92 dB(A) –25] 67 dB(A).

Example:
1. The environmental noise level as measured at the ear is 92 dBA.
2. The NRR is 25 decibels (dB).
3. The level of noise entering the ear is approximately equal to [92 dB(A) –25] 67 dB(A).

The level of noise entering a person’s ear, when a hearing protector is worn as directed, is closely approximated by the difference between the A-weighted environmental noise level and the NRR.

**Note:**
- Made in Taiwan

**INSTRUCTIONS**
- With earmuff headband positioned directly over the head, pull the cups outward and position over your ears so that they fully enclose the ear and seal tightly against the head.
- Adjust headband to reduce the space between head and band.
- Remove all hair and other objects from under the cushions. The entire cushion surface should press firmly, but comfortably, against your head.
- Earmuffs, and their cushions, may deteriorate with use and should be examined for cracking or other deformations. Replace unit as necessary.
- Routinely wash with mild soap. The foam liner should be allowed to air dry before reinserting into the cups.

**WARNING**
- Use this laboratory derived attenuation data for comparison purposes only.
- Failure to obtain a proper fit will reduce effectiveness of hearing protectors and could result in hearing loss or injury.
- Using too much hearing protection can be dangerous. The wearer must be able to hear warning signals. It is the employer’s responsibility to ensure that the type of hearing protector and its NRR is appropriate for the user in their particular workplace.
- Users with hearing loss should exercise extreme caution.
- Failure to follow these warnings could result in serious injury or death.

**ADVERTENCIA**
- Use los presentes datos obtenidos del laboratorio sólo para fines de comparación.
- No acomodar de manera correcta los protectores de oídos reducirá su eficacia y puede resultar en la pérdida del oído o en lesiones.
- Usar demasiado los protectores de oídos puede ser peligroso. El usuario debe ser capaz de oír las señales de advertencia. Es responsabilidad del patrón cerciorarse de que el tipo de protectores de oídos y su NRR sea apropiado para el usuario en su lugar particular de trabajo.
- Los usuarios con pérdida del oído deben extremar precauciones.
- No tomar en cuenta estas advertencias puede resultar en lesiones graves o la muerte.
