

parallax™
safety eyewear

See Comfort From An Entirely New Point of View.

Looking beyond traditional views, **Parallax™** introduces a new perspective on comfort in safety eyewear. The latest innovation in Gateway Safety's family of Temple Technology® products, **Parallax** features patented temples that consist of two distinct component parts, which work together to provide never-before-seen comfort in eye protection.

The rigid, top temple piece provides stability, keeping your safety eyewear firmly in place. The lower temple component is made of a soft, flexible polymer that serves as a cushion to eliminate temple pressure and maximize comfort. Plus, the gap between the two components and their contrasting colors creates a one-of-a-kind style.

Parallax features a large, one-piece lens which provides exceptional coverage, including side impact protection. An integrated brow guard helps block debris falling from above. **Parallax** meets ANSI Z87+, CSA Z94.3 and the ballistic impact resistance requirements in the U.S. Military Specification MIL PRF-31013.

New perspective, superior comfort, exceptional performance. Between comfort and safety, **Parallax** is today's true visionary leader in eye protection.

Gateway
SAFETY

Parallax™ features the next revolutionary temple design introduced under the Temple Technology® umbrella.
