

# SteelyBlues™

## (Metal) Detective Work ...at its Finest

Let your safety eyewear enhance your detective work! **SteelyBlues™** safety glasses are the new steel standard in metal detectable safety eyewear. With patent-pending, end-to-end metal detectability, **SteelyBlues** is a true innovation in eye protection. Its revolutionary design includes detectable metal in all five product components—the two temples, the two screws and the innovative, patent-pending frameless lens.

With polished blue steel strips in the temples and lens, plus translucent blue temples, **SteelyBlues** provides an identifiable look for both style and compliance. Plus, its ergonomic, lightweight design (weighs less than one ounce) makes it easy to wear all day.

**SteelyBlues** also features Gateway Safety's fX3™ Premium Anti-Fog lens, which provides superior, longer-lasting fogging resistance. It also meets ANSI Z87.1+, CSA Z94.3 and the ballistic impact resistance requirements for eyewear in US Military Performance Specification MIL PRF-32432.

Serious protection, premium anti-fog and end-to-end detectability in one unique pair of safety glasses. That's **SteelyBlues**.
