Tri-Grip®

The Industry Choice in Reusable Earplugs.

Tri-Grip® earplugs are one of the most popular solutions in modern-day hearing protection. **Tri-Grip** has an independently tested 27 NRR, the highest third-party tested, reusable earplug rating available.

With a patented, three-sided stem that provides a stable, comfortable grip, **Tri-Grip** has become the premium choice for reusable earplugs among workers. This three-sided grip allows workers to insert the plug into the ear without any rolling or touching other areas - providing a more hygienic earplug solution.

The **Tri-Grip** stem also includes a semi-rigid insert, bonded with adhesive, which allows for easy insertion without too much pressure. Soft, curved flanges further ensure a comfortable fit, helping the plugs conform to the shape of the ear canal. **Tri-Grip** is also available in **Tri-Grip JR**, 10% smaller to fit smaller ear canals. Plus, **Tri-Grip MD** and **Tri-Grip M Tek™** offer metal detectable versions.

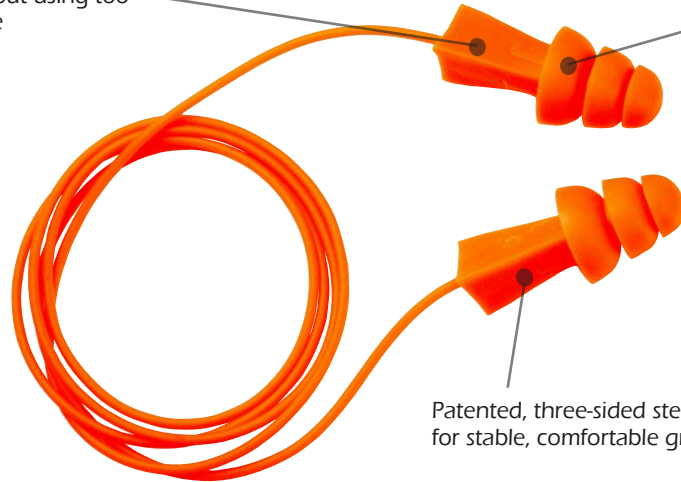

Tri-Grip is proudly made in the USA.

Tri-Grip® Features

Semi-rigid stem allows for easy insertion without using too much pressure

Soft, curved flanges help the plug conform to the natural shape of the ear canal

Patented, three-sided stem for stable, comfortable grip
