

HELMSMAN[®]

SAFETY GLASSES

**Engineered to always
keep you on course.**

When navigating workplace hazards, Helmsman[®] is the solution for the whole crew. Weighing less than one ounce, these safety glasses are comfortable for all day wear, while still delivering ballistic level impact protection.

Helmsman features a one-piece, polycarbonate lens and translucent temples. A molded faux frame provides Helmsman subtle styling without the added weight - or cost - of a framed product. Plus, dielectric components help Helmsman stay on course in work environments that might encounter electrical hazards.

Like our original StarLite[®], Helmsman integrates high quality protection and user comfort with straight-forward styling to arrive in port 'on time' and 'on budget.' It's a new direction for eye protection - and Helmsman is steering its way toward another successful journey.

Gateway
SAFETY

Helmsman® is lightweight and comfortable, and available in a variety of lens options for indoor or outdoor use.
