

Taking the right path to proper protection.

On a trajectory all its own, Vector7® is the new standard in achieving the perfect fit. Safety glasses should cover all the angles to protect the eyes. With seven different temple positions, Vector7 can be adjusted at just the right angle to get the best fit AND the best protection.

Translucent temples create a sleek style, while reaching further around the head to help prevent slipping. A wraparound lens extends side coverage to ensure no gaps. Plus, Vector7 weighs less than an ounce, making it easy to wear all day without discomfort.

Available in both indoor and outdoor lens options, Vector7 also comes in clear and gray fX3 premium anti-fog, a better performing anti-fog solution for environments that call for it.

Take the path to comfortable, stylish and better fitting protection with Vector7 safety glasses.

Vector7® Features

- 7-Position ratcheting temples help achieve an ideal fit.
- Remarkably lightweight, weighing less than one ounce.
- One-piece, wraparound polycarbonate lens with a translucent faux frame for distinctive style.
- A Temple Technology® product, Vector7's unique, ratcheting and wraparound temples keep glasses comfortably in place.
- Available in fX3™ Premium Anti-Fog — longer lasting and more effective than other anti-fog coatings.
- Independently tested and certified by UL to meet ANSI Z87.1+ and CSA Z94.3 standards; meets the ballistic impact resistance requirements for eyewear in U.S. Military Performance Specification MIL PRF-32432 (GL).

Unique hinge component has 7 different positions to get the perfect fit

Vector7®'s ratcheting temples offer seven positions for adjustment to the ideal fit.
